

Aim:

Write a Java program to illustrate the **abstract class** concept.

Create an abstract class `CalcArea` and declare the methods **triangleArea(double b, double h)**, **rectangleArea(double l, double b)**, **squareArea(double s)**, **circleArea(double r)**.

Create a class `FindArea` which extends the abstract class `CalcArea` used to find areas of triangle, rectangle, square, circle.

Write a class `Area` with the **main()** method which will receive **two** arguments and convert them to **double** type.

If the input is given as command line arguments to the **main()** as "1.2","2.7" then the program should print the output as:

```
Area of triangle : 1.62
Area of rectangle : 3.24
Area of square : 1.44
Area of circle : 22.890600000000006
```

Note: Please don't change the package name.

Source Code:

q11286/Area.java

```
package q11286;
public class Area {
    public static void main(String args[]) {
        FindArea area = new FindArea();
        area.triangleArea(Double.parseDouble(args[0]), Double.parseDouble(args[1]));
        area.rectangleArea(Double.parseDouble(args[0]), Double.parseDouble(args[1]));
        area.squareArea(Double.parseDouble(args[0]));
        area.circleArea(Double.parseDouble(args[1]));
    }
}
// Write all the classes with definitions
abstract class CalcArea
{
    abstract void triangleArea(double b,double h);
    abstract void rectangleArea(double l,double b1);
    abstract void squareArea(double s);
    abstract void circleArea(double r);
}
class FindArea extends CalcArea
{
    void triangleArea(double b,double h)
    {
        System.out.println("Area of triangle : "+(0.5*b*h));
```

```

{
    System.out.println("Area of rectangle : "+l*b1);
}
void squareArea(double s)
{
    System.out.println("Area of square : "+s*s);
}
void circleArea(double r)
{
    System.out.println("Area of circle : "+3.14*r*r);
}
}

```

Execution Results - All test cases have succeeded!

| Test Case - 1 |
|--|
| User Output |
| Area of triangle : 7.529400000000001 |
| Area of rectangle : 15.058800000000002 |
| Area of square : 12.6736 |
| Area of circle : 56.183706000000001 |

| Test Case - 2 |
|--|
| User Output |
| Area of triangle : 83.143750000000001 |
| Area of rectangle : 166.28750000000002 |
| Area of square : 157.50250000000003 |
| Area of circle : 551.26625 |
